

Alta Sierra Intermediate & Buchanan High School Care Room

CUSD Nursing Services has created a “care room” for students that present at school with possible COVID-19 symptoms. If a student presents with possible COVID symptoms anytime during the school day, they will be picked up by a BHS staff member and brought to the “Care Room” located on the Alta Sierra campus.

The Health Office staff will contact parents to pick up their student within the hour. Parents will need to report to the BHS attendance windows for ID verification and will be given a slip to pick their child up in the Care Room. Access and parking for the Care Room is on Victory Lane (see map below).

Please note, if your child goes home with COVID symptoms, most likely, they will need to stay home for 10 days or get a negative COVID test per FCDPH guidelines. You will also be given a symptom letter from BHS and FCDPH with further information.
